TYLO-RICH

Tylosin Phosphate (10%)

Safety

TYLO-RICH is absorbed by the GIT (gastrointestinal tract) when taken oral route. TYLO-RICH is a safety medicine and used to treat bacterial infections in a wide range of species and also as a treatment for colitis in companion animals. Scientific literature and practices recommended to use Tylosin phosphate as a growth promoting in some animal species.

"How TYLO-RICH works?"

"TYLO-RICH helps combat a broad range of bacterial infections in poultry, including Mycoplasma organisms. TYLO-RICH has an activity of broad spectrum against Gram-positive & selective Gram-negative micro-organisms (inhibiting bacterial protein synthesis).

Key Advantages-

- TYLO-RICH Supports Gut Health: "Supports gut health (GIT) and Reduces the impact of harmful bacteria like C. perfringens, which can cause necrotic enteritis".
- Supports Respiratory Health: TYLO-RICH helps control Mycoplasma infections associated with chronic respiratory disease (CRD) and promotes respiratory health in chickens and turkeys.
- Improves Performance: TYLO-RICH can contribute to improved weight gain, feed conversion efficiency, and Egg production in poultry (consult your veterinarian for dosage details).

Recommended Usage/Dosage (for 1 Ton feed)

Broilers: 200-250 grams per ton of feed

Layers : 500 grams per ton of feed

Breeders: 250-500 grams per ton of feed from start of egg laying to 42nd Week.

Note : Consult a veterinarian for proper dosage based on your specific flock needs.

Withdrawal Period : 5 days before slaughter when fed to chickens at 800-1000 g/ton.

For best RESULTS add the TYLO-RICH (Tylosin Phosphate) with feed at regular time intervals as prescribed by the veterinary consultant.

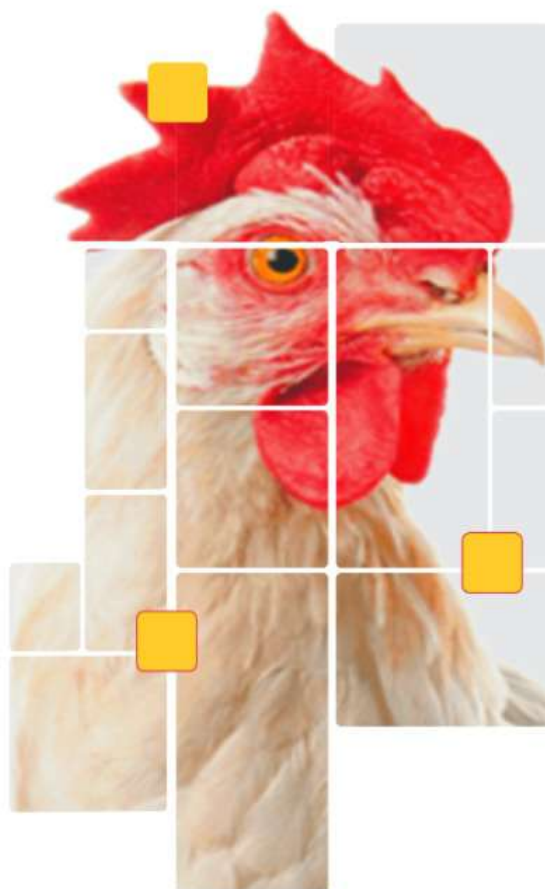

Storage : Store at room temperature and Keep away from moisture.

Caution

Not for Human Use, Avoid breathing directly.
If skin irritation or a rash occurs: Get medical advice/attention. Wear protective gloves/ protective clothing/eye protection/face protection
